

Free Green IT Support

Do you want to cut costs and improve the processes surrounding your IT systems?

Would you be interested in free support to reduce the environmental footprint of your IT systems?

Are you an business in London with less than 250 employees?

European Regional
Development Fund
Investing in your future

GlobalActionPlan
creating the climate for change

Global Action Plan's environmental IT programme is a free service for small and medium businesses. Our trained Green IT Business Advisors will work with you to implement a more sustainable and efficient IT infrastructure, at no cost to you.

Benefits to your business are:

- Reduce energy costs and waste
- Increase hardware return on investment
- Improve processes around your IT infrastructure
- Enhance your green credentials to staff, customers and suppliers
- Network with other London based businesses

Global Action Plan is a practical environmental charity that has over 15 years experience in behaviour change and business advice. Our tried-and-tested workplace programmes deliver tangible and significant environmental and financial savings to businesses of all sizes. Green IT is one of our specialities, we lead the Environmental IT Leadership Team (EILT) and drive improvements in the IT sector's efficiency through research and business mentoring.
